Passage:

The passage given below is followed by a set of four questions. Choose the most appropriate answer to each question.

The current debate on the land law is important because it affords us a chance to reflect more deeply on the nature of India's development process and the experience of democracy for a majority of our citizens. I see the 2013 land law as part of a response - highly belated in my view - to the perception of millions of our people that while India's economy was booming over the last two decades, they were not part of the growth story.

Indeed, many people feel that development has happened at their cost. Official estimates place the number of people displaced due to development projects since Independence at 60 million, less than a third of whom have been properly resettled. Most of the displaced are the asset less rural poor, marginal farmers, poor fisherfolk and quarry workers. Around 40 per cent of them are Adivasis and 20 per cent Dalits. Official statistics testify that on all indicators of development, Dalits and Adivasis have been the worst-off groups. Already at the bottom of the development pyramid, being deprived of their land and livelihoods has completely pauperised them, forcing many to move and live in subhuman conditions in our metros. The last two decades have also seen unprecedented agrarian distress, with more than two lakh farmers committing suicide, as per the National Crime Records Bureau. This is something that had never happened before in Indian history.

It is in this backdrop that we need to understand the heightened sensitivities and palpable anger over forcible land acquisition. Given that 90 per cent of our coal, more than 50 per cent of most minerals, and prospective dam sites are mainly in Adivasi regions, there has been, and is likely to be, continuing tension over issues of land acquisition. Through these tensions, not only has a question mark been placed over our development strategy, the delicate fabric of Indian democracy has become terribly frayed at the edges. In the remote Adivasi heartlands of India, people feel such a deep and abiding sense of hurt, alienation and cynicism that they have allowed themselves to be helplessly drawn into a terrible vortex of violence and counter-violence, even when they know in their heart of hearts that it will lead to their own destruction.

The 2013 land law tried to reach out to these people by undoing a draconian colonial Act more suited to a 19th century empire than to a 21st century vibrant democracy. At the heart of the 2013 law was the provision of seeking the consent of those whose lands were to be acquired and of caring for those whose livelihoods would be destroyed in the process. Undoing these provisions is a virtual resurrection of undiluted powers of 'eminent domain', which the 1894 law conferred on the State. I do not dispute the fact that there can be many situations where land is needed for a development project that could actually benefit those whose lands are being acquired. What could be the possible harm in seeking the prior, informed consent of these people, after making the effort of explaining to them how they would stand to benefit? There are those who argue that farmers would be better off giving up farming. Indeed, they say that farmers do not want to farm any more. Why would these farmers conceivably say no if we were to propose more attractive and tangible alternative options to them in return for their land? Is it not for farmers to assess whether the project will actually be of benefit to them and whether the recompense offered to them is a fair bargain?

Itemcode : MO1262

Q62 Which of the following options would the author most agree with?

- :
(a) India cannot continue with a pattern of industry that generates so few jobs but has such a large displacement outcome.
(b) India's development has been at the cost of the marginal farmer who has never received adequate compensation for the price of progress.
(c) The land law debate must be the occasion to talk about key national agendas.
(d) Displacement of individuals is part of the story of any developmental thrust.

Itemcode : **MO1263**

Q63 It can be inferred that when the author refers to "eminent domain" he means

:

- (a) The provision to seek consent from those whose lands were to be acquired.
- (b) The power of the State to acquire land forcibly from the owners of private property.
- (c) The inevitability that the land owned by people would eventually be up for acquisition by the state.
- (d) Land has more eminent and powerful uses when it is acquired for government use.

Itemcode : **MO1264**

Q64 Which of the following options would go against the argument in the passage?

:

- (a) Determining the Social Impact of a project can help the government understand if a proposed project is necessary.
- (b) Many people are rightly concerned about the cost of the decisions taken in development projects.
- (c) If we want to acquire the land of farmers to serve larger goals, the projects in which they are embodied must not be of the kinds that repeat the mistakes of the past.
- (d) The last two decades have seen a man made agrarian crisis that has been unprecedented.

Itemcode : **MO1265**

Q65 Which of the following options is the best solution that the author seems to suggest at the end of the passage?

:

- (a) The government must listen to farmers and allow them to suggest solutions to land acquisition issues.
- (b) Social provisions must be made for those farmers who are to be affected by the land acquisition policies of the government.
- (c) The compensation to farmers must be commensurate to the cost that they incur as a result of giving up their land.
- (d) Malpractices in land acquisition should be checked with the setting up of a regulatory body.

Passage:

Many people find it difficult to understand Shakespeare, but surprisingly he wrote in modern English. Elizabethan English has more similarity to our English than it has with that written by Chaucer. Certainly, many familiar words were first formed or coined by Shakespeare. Around 2000 words and even more phrases owe their origin to Shakespeare. First time readers of his writing are normally surprised by the overwhelming number of clichés present in his plays not knowing that he coined them and they were later adopted or became part of English. Examples of such phrases are vanish into thin air, one fell swoop, and flesh and blood. Passage:

One of the best feelings in the world that also brings so much of cheer to life is laughter. It really is one of the best medicines in the world. Also, whether it's a smile or just a slight giggle, laughter completely alters the atmosphere and mood of the surroundings. Furthermore, it makes you feel good and everyone around you will also feel positive vibes. Laughter acts as a powerful antidote for pain, stress, and conflict. There is nothing that works faster in order to bring back mind and body into balance than a good laugh. Also, humor lightens your burden, connects you to others and keep you focused. Thus, laughter has so much power to renew and heal one's mind and body. Also, the ability to laugh frequently is the best way to surmount the problems. Furthermore, it supports your emotional as well as physical health. Additionally, laughter also enhances your relationships.
